Studio 3000K

COMPANY OVERVIEW

RESIDENTIAL LIGHTING IN SINGAPORE

Lighting planned around your space

Studio 3000K plans and supplies lighting for home renovations and new builds. We work with you and your designer on where light should go, which fittings suit the space and how the rooms should feel after dark.

LIGHTING SAMPLE KIT

How we work

Start with the brief	We review your floor plan, how you use each area and which decisions are still open.
Plan and compare	We develop or refine the layout. A sample visit helps you see how selected fittings light your finishes.
Select and supply	We quote the agreed fittings, provide product details for your installer and handle the product warranty.

Lighting we supply

Downlights, magnetic track, LED strips and profiles, plus decorative and outdoor fittings selected for the project.

Working with your team

We can work from your architect's or interior designer's plan or develop the layout with them. Your appointed electrician handles wiring and installation.

Discuss your project

Tell us what you're planning and where you are in the process.
